CENTRE FOR MIGRATION, SKILLS MOBILITY AND DEVELOPMENT AT MICHAEL OKPARA UNIVERSITY OF AGRICULTURE (MOUUAU)

*Establishment of a Migration Resource Centre, Language Expansion and Migration Research Capacity
Institutional Anchor: MOUUAU, Umudike, Abia State*

1. Summary

CSO net MADE Abia and Michael Okpara University of Agriculture (MOUUAU) have concluded a Memorandum of Understanding to establish a Centre for Migration, Skills Mobility and Development. The Centre will combine a Migration Resource Centre (counselling on regular pathways, pre-departure orientation and referral), the expansion of the University's existing German and French language programmes to internationally certified levels, and a dedicated migration research unit serving the South-East. The University's most critical need and our most direct request is support for a dedicated facility to house the Migration Resource Centre; with facility funding, the Centre becomes operational almost immediately.

2. Policy Alignment

- SEMD 2026 Communiqué - resolutions on academia, research institutions and migration data;
- NMP 2025 - capacity-building, evidence-generation and localisation mandates;
- Global Compact for Migration - Objectives 3 (accurate data) and 15 (access to basic services);
- Partner priorities on higher-education cooperation, language skills and employability.

3. Key Components

- Construction/renovation and equipping of the Migration Resource Centre facility on the MOUUAU campus;
- Expansion of German and French programmes to Goethe/DELF certification levels, open to students and community youth;
- A migration research and postgraduate studies unit producing South-East migration profiles and the annual State of Migration report;
- A verification desk enabling pre-departure scrutiny of overseas employment offers, a direct counter-measure to trafficking through fraudulent recruitment.

4. What We Bring

A signed MOU with a federal university of agriculture; existing language faculty to build upon; CSONetMADE's community interface across Abia State; and alignment with NCFRMI's institutional presence in the South-East.

5. What We Seek

Facility funding (construction or renovation and furnishing), a language laboratory, research grants, and technical assistance in curriculum development and resource-centre management. Naming and visibility arrangements for the contributing partner are welcome for discussion.

Dr Charles Ukauwa,
Abia State Coordinator, CSONetMADE,
Convener, Southeast Migration Dialogue (SEMD 2026).
