United for Voluntary, Safe and Dignified Migration

PUBLIC AWARENESS AND CSO CAPACITY-BUILDING PROGRAMME ON SAFE PATHWAYS, VISA POLICIES AND ANTI-TRAFFICKING

*A Region-Wide Programme Informing the South-East on Migration Opportunities, Obligations and Risks
While Building Permanent Civil-Society Capacity*

1. Summary

CSONetMADE Abia proposes a comprehensive programme across the five South-East states that makes accurate, mission-verified information on skills and job-placement needs, visa and immigration policies, and return and reintegration programmes available to young people, while simultaneously training and deploying a cadre of professional migration-information officers within civil-society organisations. The campaign is therefore also a capacity-building investment: the awareness does not end when funding ends, because trained CSOs carry it forward. A dedicated module addresses the emerging pattern of trafficking through fraudulent 'tech-job' recruitment into forced criminality abroad.

2. Policy Alignment

- SEMD 2026 Communiqué - Priorities 4 (awareness of regular pathways), 5 (grassroots participation) and Section D (civil society roles);
- NMP 2025 - information, protection and whole-of-society governance;
- Global Compact for Migration - Objectives 10 (dignified treatment) and 12 (skills verification against fraudulent recruitment);
- Partner-country interests in reduced irregular flows, visa-integrity and informed applicants.

3. Key Components

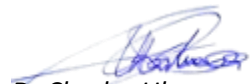

- Mission-verified information content on each partner country's skills demand, visa categories and reintegration offers, disseminated through universities, radio, town halls, faith institutions and digital platforms;
- Training and certification of at least 100 CSO migration-information officers across the five South-East states, institutionalised within the CSONetMADE network;
- Pre-departure orientation and a public job-offer verification service linked to the MOUAU and Polytechnic resource centres;
- A targeted anti-trafficking module on fraudulent tech/digital job offers, developed with NAPTIP.

4. What We Bring

A state-wide and zonal CSO network; the SEMD 2026 platform and communiqué credibility; working relationships with NAPTIP, NIS, NCFRMI and state institutions; and two institutional MOUs providing physical delivery points.

5. What We Seek

Programme funding, verified content from partner missions, creative-production support, and technical assistance in training design. Partners will be formally recognised in all campaign materials, positioning them as the foremost accessible source of authoritative migration information in the South-East.
