RETURNEE REHABILITATION AND REINTEGRATION PROGRAMME, ABIA STATE

Operationalising NCFRMI's Selection of Abia State for a Centre for Returnee Rehabilitation and Reintegration

1. Summary

NCFRMI has mapped Abia State as the site for a Centre for Returnee Rehabilitation and Reintegration serving the South-East. CSOnetMADE Abia proposes to partner with NCFRMI, the Abia State Government and international partners to operationalise this Centre and the community-level reintegration system around it: reception and case management, trauma-informed psychosocial care, livelihood grants and business incubation, and community anti-stigma engagement, deliberately linked to existing health, social protection and livelihood programmes, as the Southeast Migration Dialogue Communiqué requires.

2. Policy Alignment

- SEMD 2026 Communiqué - Priority 8 (return, readmission and reintegration);
- Assisted Voluntary Return and Reintegration Standard Operating Procedures (2019);
- NMP 2025 - reintegration and sub-national governance mandates;
- Partner-country return, reintegration and stabilisation portfolios.

3. Key Components

- Establishment and equipping of the Centre's reception, counselling and case-management functions;
- Comprehensive reintegration packages: economic (grants, incubation, market linkage), psychosocial, and social (family mediation, anti-stigma campaigns, education re-entry);
- A referral protocol connecting returnees, including trafficking survivors from forced-scamming operations to NAPTIP, health and protection services;
- Follow-up monitoring at 6, 12 and 24 months, with outcome reporting to NCFRMI and partners.

4. What We Bring

The mapped site and federal anchor through NCFRMI; CSOnetMADE's grassroots follow-up capacity across Abia communities; political ownership of the Abia State Government; and linkage to the emerging State Migration Agency for case-data management.

5. What We Seek

Centre establishment and operational funding, reintegration packages for returnees, technical assistance on trauma-informed case management, and support for the monitoring framework. Partners will be associated with the South-East's flagship reintegration facility at its inception.

Dr Charles Ukauwa,
